COPYING

The *Journal* is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/86/4686-0001 $05.00.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 169 August 1986

CONTENTS

Thermocapillary free boundaries in crystal growth. C. CUVELIER and J. M. DRIESSEN *page* 1

The creeping motion of a spherical particle normal to a deformable interface. A. S. GELLER, S. H. LEE and L. G. LEAL 27

Unstable transition properties of the driven magnetohydrodynamic sheet pinch. R. B. DAHLBURG, T. R. ZANG and D. MONTGOMERY 71

On the origin of streamwise vortices in a turbulent boundary layer. P. S. JANG, D. J. BENNEY and R. L. GRAN 109

Unstable jet–edge interaction. Part 1. Instantaneous pressure fields at a single frequency. RUHI KAYKAYOGLU and DONALD ROCKWELL 125

Unstable jet–edge interaction. Part 2. Multiple frequency pressure fields. RUHI KAYKAYOGLU and DONALD ROCKWELL 151

Natural convection in an enclosed vertical air layer with large horizontal temperature differences. D. R. CHENOWETH and S. PAOLUCCI 173

Three-dimensional buoyancy-driven flows in cylindrical cavities with differentially heated endwalls. Part 1. Horizontal cylinders. P. BONTOUX, C. SMUTEK, B. ROUX and J. M. LACROIX 211

Bifurcations in Couette flow between almost corotating cylinders. M. NAGATA 229

Note on added mass and drift. T. BROOKE BENJAMIN 251

The propagation of a Kelvin wave around a bend in a channel. A. J. WEBB and S. POND 257

Waves caused by a moving disturbance in a shallow channel of finite width. R. C. ERTEKIN, W. C. WEBSTER and J. V. WEHAUSEN 275

Internal gravity waves in shear flows at large Reynolds number. CORNELIS A. VAN DUIN and HENNIE KELDER 293

Thick $E^{\frac{1}{4}}$ Stewartson layers in a rapidly rotating gas. LENNART S. HULTGREN and FRITZ H. BARK 307

Dissipative waves in fluids having both positive and negative nonlinearity. M. S. CRAMER, A. KLUWICK, L. T. WATSON and W. PELZ 323

Self-similar solutions of the shallow-water equations representing gravity currents with variable inflow. R. E. GRUNDY and JAMES W. ROTTMAN 337

Two-dimensional disturbance travel, growth and spreading in boundary layers. F. T. SMITH 353

Rotating flows along indented coastlines. JOSEF CHERNIAWSKY and PAUL H. LEBLOND 379

Surface waves of large amplitude beneath an elastic sheet. Part 1. High-order series solution. LAWRENCE K. FORBES 409

Resonant flow of a stratified fluid over topography. R. H. J. GRIMSHAW and N. SMYTH 429

Response behaviour of hot wires and films to flows of different gases. WILLIAM M. PITTS and BERNARD J. MCCAFFREY 465

Secondary vortices in the wake of circular cylinders. T. WEI and C. R. SMITH 513

Mechanisms of impulsive pressure generation and damage pit formation by bubble collapse. Y. TOMITA and A. SHIMA 535
